KLPA Farmers Forum May 2018

TCM Dr. Michael Makau speaking with her Excellency Joyce Laboso, Governor of Bomet County about our portfolio of mineral supplements.

This month's edition of the KLPA Agribusiness Trade Fair was held in Bomet County at the Bomet Stadium. The platform provided an opportunity for farmers to learn and interact (with TCM technical experts led by Dr. Michael Makau and Adams Muchira) about livestock health and nutrition from our

Magadi Moore range of mineral supplements.

Also in attendance was her Excellency the governor of Bomet County Dr. Joyce Laboso in picture with Dr. Michael Makau who visited our stand at the forum

Tree planting at Oldonyonyokie Girls Secondary school.

On the 29th May TCM in conjunction with Kajiado County Government, NEMA and the Kenya Forest Service officially launched a tree planting exercise at Oldonyonyokie Girls Secondary school in preparation for the World Day to Combat Desertification celebrations which will officially be launched by the His Excellency the Deputy President of Kenya Hon.

1. Dr. Lange, Deputy Director planning and research NEMA, actively participating in the tree planting exercise.
2. Joyce Mutuku- Kenya Forestry Service.
3. Isaac Nyoike - Tata Chemicals Magadi SHE Manager, actively participating in the Tree planting exercise

William Ruto on the 17th of June. To this cause, we shall be donating 1,000 seedlings.

Please join the conversation by using the hashtag [#Tata2milliontrees#](#) or [#PandaMtiPendaKenya](#), when planting trees.

Food Relief in Shompole and Nguruman townships.

On May 2018 as a result of heavy down pour in Loita forest and Narok three rivers: Oloibortoto, Entasopia, and Ewuaso Ng'iro broke their banks and displaced approximately 1000 people both directly and indirectly in Nguruman in Olkiramatian west.

To mitigate the effects of this catastrophe, TCM provided relief food to the victims of the floods in both Pakaase and Nguruman. Additionally, As a result of the rains the normal public transport routes that serves the entire Magadi division were completely destroyed and others like Magadi Oloika road

and Kamukuru section of Magadi road become impassable due to water levels.

Tata Chemicals Magadi responded by creating a 2kilometers diversion in Kamukuru and a 41 Kilometers diversion connecting Magadi to Oloika circumventing lake Magadi. The same Oloika diversion was linked to Magadi-Olkiramatian road in Embirika. Between Magadi and Embirika the company backfilled, cleared and levelled 20 kilometers of Olkiramatian-Magadi road that were cut off by surface run-off.
